

## Claims

1. An inflatable bladder made from a fluid-impervious film providing a liner for the bladder and from a flame-resistant fabric providing a cover for the bladder.

5        2. The inflatable bladder of claim 1, wherein the fluid-impervious film and the flame-resistant fabric are laminated to each other.

3. The inflatable bladder of claim 2, which comprises two sheets bonded to each other, along what becomes an outer edge of the inflatable bladder, each sheet being made from the fluid-impervious film and from the flame-resistant fabric  
10        laminated to the fluid-impervious film.

4. The inflatable bladder of claim 3, wherein the fluid-impervious film of one said sheet is bonded to the fluid-impervious film of the other sheet, along what becomes an outer edge of the bladder.

5. The inflatable bladder of claim 1, 2, 3, or 4, after being inflated with a  
15        gas, with a liquid, or with a gel.
